

# Milk Carton Opener

## USER QUICK GUIDE

### Introduction

The Milk Carton Opener is an aid for people with limited grip strength to make it easier to open screwcap lids such as those found on aseptic carton packages like Tetra Pak® milk and juice cartons. The flat side of the aid is intended for larger caps aid has two sides for opening

### Features

### Usage

To use the device, place the hole in the device over the lid of the carton. Each side of the device has a different sized lid, so if it does not fit in one side, try the other. This will provide a larger grip for the user on the lid of the carton so less grip force is required to open the lid.

# Milk Carton Opener

## USER QUICK GUIDE

### Compatibility
