

# Milk Carton Opener

## SUMMARY

### Title

Milk Carton Opener

### Subtitle

An aid for people with limited grip strength to make it easier to open screwcap lids.

### Device Details

#### Overview

The Milk Carton Opener is an aid to make it easier to open screwcap lids, such as those found on Tetra Pak cartons of milk, juice, and stock. This may be useful for people with limited dexterity or grip strength. The aid has two sides that fit two different sizes of cap.

#### Usage

To use the device, place the hole in the device over the lid of the carton. This will provide a larger grip for the user on the lid of the carton so less grip force is required to open the lid.

#### Cost

<\$1

#### Build Instructions

##### *Skills Required*

- 3D printing

##### *Time Required*

- 3D printing time: 1h46min
- Assembly time: None

##### *Tools*

- 3D printer
- Hobby knife

##### *Components*

- 1x Milk Carton Opener
